Snowpack depth: 115 cm

Elevation: 2,011 m	Wind: Calm	First trip up to Simpson plot this season. Interval board needed at some point. Dec. 3rd layer obvious in pit wall and some whumphing at helipad. Seems to be limited to between 2150 m and 1700 m based on multiple observations on ski up and out. Below 1700 m it has been rained on, above 2150 m it was above inversion and didn't form. Rugged skiing out bottom of Simpson 1 with thick alders.
